Batam 2010
SPECIAL ZONE

Organized by:

Supported by:

Sumatera, formerly known Andalus or Golden Island is one of the large island in the world – two times larger than Malaysia peninsula and having a population equal to that of Thailand. It has vast natural resources, varied cultures and religions. Since the 1500, Sumatera has been an important stop for international ocean travel. Sumatera has excellent prospect for developing business and investment because of its central location between continents.

In order to speed up economics development in this island, all Governors from Sumatera have decided to formulate what so called "Agenda Sumatera".

The construction of Sumatera Promotion Centre building and the establishment of PT. Sumatera Promotion Centre (PT. SPC) are the implementation of the Agenda. PT. Sumatera Promotion Centre which is owned by the ten provincial government in Sumatera has basic mission to create trading and investment opportunities and promote tourism destination through-out the island.

The Sumatera Promotion Centre building was opened on November 23rd, 2005, in conjunction with the first Sumatera Expo (SUMEX) and Sumatera Art & Culture Shows (SACS) 2005. The event successfully attracted thousand buyers, businessmen and visitors. Up to now, more than six hundred delegations participate as exhibitors in SUMEX 2005, 2006, 2007, 2008.

SUMEX 2009 and SACS 2009 will continue to contribute positive results for investment development, sales of the best products, and the promotion of tourism destinations.

SUMEX and SACS are the first and the biggest events in Sumatera and it's an opportune moment to enlarge the business network, to develop brand and to increase business transaction volume.
